VLB MEMORANDUM #101

TO: Addressee

FROM: H. Hvatum

SUBJECT: Distribution of VLB Memos

This is the first, but hopefully not the last, memo in the VLB memo series. This series is patterned after similar series of memos established for the 25m telescope, various VLA topics, etc. The purpose of a numbered series of informal (and formal if you wish) memos is to collect in a retrievable form clever ideas and thoughts (as in this memo), technical information and other topics relevant to the VLB effort intended mainly for internal use. There will be no general mailing list. The requirement for receiving regular copies of this outstanding literature is that you are an active (and productive) member of the VLB group. Here is a list of those who presently seem to qualify.

Balister, M.
Burch, J.
Burns, B.
Elcox, B.
Hansen, S.
Hvatum, H.
Kellermann, K.
Meredith, B.
Rayhrer, B.
Schaffer, D.
Wireman, B.

Donna Eason will issue numbers on request, and organize the distribution of these memos.

Add G. Grove
R. Fisher
R. Lalasse
B. Vrable
