

Informal MMA receiver meeting

Brown Webber Pan Kern Payne Basley Thompson

Pospieszalski

phone: Daddario Emerson

June 1999: first antenna, holography @ 38 GHz, ~230 GHz
all for antenna evaluation

With image-separating, balanced mixers: expect for 230 GHz band eq.
to use $\sim 3 \mu\text{W}$ LO power
so target $10 \mu\text{W}$ and we certainly be OK

Bowers at Univ. California ^{SD} thinks he can do the photomixers
would supply chip - we design the package etc.
