

NATIONAL RADIO ASTRONOMY OBSERVATORY
Charlottesville, Virginia

March 7, 1985

Memorandum

To: VLBA Scientific Advisory Group
From: K. I. Kellermann
Subject: March 15 meeting

The next meeting of the Scientific Advisory Group will be at 1300 EST on March 15. Please note that this time differs from that shown in VLBA Memo No. 416, but conforms with the time slot of the weekly Coordinating Committee meeting. The number to call is (203) 797-9080 and the Conference ID Number is 999K.

The project group had an extensive design review in late January in Socorro, and a summary of this review is given in VLBA Memo No. 430. We will not review this material in detail at our meeting, but there will be an opportunity to discuss items which may be of specific interest to members of our committee. So please be familiar with the contents of Memo No. 430 prior to our meeting.

Other agenda items are:

- 1) Status of the project in Washington.
- 2) Progress report, budgets, and schedules.
- 3) Support of pulsar observing (Rogers, see VLBA Memo No. 435).
- 4) Do we want (need) an interim processor? Ewing
- 5) 3.5 mm observing.
- 6) Array configuration.

Please let me know if you have any other agenda items prior to the meeting.
