12 METER MILLIMETER WAVE TELESCOPE  
MEMO No. 139

Subject:

Central Fabricators in Lynchburg, VA has been contacted on the status of the 12M back-up structure and it appears that assembly will be complete through at least the hub structure, inner ring and one outer ring by March 22. I have informed CenFab that our group from NRAO plan on visiting their plant at about 9:30 a.m. on Tuesday, March 23. I would suggest that we plan on traveling to Green Bank either the afternoon and evening of March 23 or the morning of March 24 and that we convene our meeting in Green Bank at 1:00 p.m. on the 24th of March.

My present plans are to travel from Socorro on Monday March 22 and to return to Socorro on Saturday March 27. Hopefully this will allow enough time for our discussions in Green Bank. If anyone has difficulties with this schedule please inform me.
