12 METER MILLIMETER WAVE TELESCOPE
MEMO No. 145

Mr. Mark Martin
Special Projects Supervisor
Kitt Peak National Observatory
Box 220
Sells Star Route, AZ 85735

Dear Curly:

This letter is authorization to begin construction of the crane parking area next to the 95' radome. As we discussed, this area will enable us to remove the present antenna surface and install a new backup structure and surface.

We have budgeted \$4000.00 for this project. I believe that this is very close to your estimate. Please use the NRAO account number 01160-00 for this project.

Our telescope schedule requires instrument changes on March 23 and 30. We will need access to the area in discussion on those dates. April 1 thru 30 are the best dates, as we will have no major changes during that time.

I would like to thank you for your cooperation and assistance in the project. It will make things much easier this summer.

Sincerely,

Paul J. Rhodes
Telescope Operations Manager
