

9 CONSORTIUM EXPERIENCE

This chapter gives the details of the relevant experience of the HIFI consortium.

A list of all HIFI consortium members, with their addresses, affiliations and relevant experience has been generated and arranged per country and institute.

In the PI institutes as well as in the Sub-System lead institutes have an extensive experience with space programs. There is also abundant experience in space cryogenic missions and in the specific technologies required for the HIFI instrument. This can, to a lesser extent, also be said for the other institutes participating in HIFI.

The involved Principal Investigators and Subsystem Leaders and the HIFI instrument management team members have all extensive experience in instrument programs of similar size and/or nature such as for XMM, Integral, ISO, ODIN, SWAS etc.

John: This list may be helpful in finding Euro's for our MMA reviews.
