

Canadian mixer group - Cunningham, Claude, Avery

245 GHz prototype

May 2000: fab & test hybrid block

mid-June: parts designed for complete assembly

should they undertake a simpler, balanced mixer first?

They need to see the prototype IF amplifier.

They spent a lot of time looking for properly-tuned mixers -
examine 10 to get 2.

Mixers for 2nd eval rcvr? Should have spares at Tucson.
