Subject: Accounting for VLBA Project

A revision of the project numbers assigned in my memo of 9/1/83 to the VLBA system is necessary in order to reduce confusion with the Construction in Progress number system, Electronics project number series, and Engineering drawing numbers.

The existing account numbers (13400 - 13450), location code 5, and object class codes remain unchanged.

The revised project numbers are as follows:

51000	Series	Site
52000	"	Antenna
53000	"	Electronics
54000	"	Data Recording
55000	"	Monitor & Control
56000	"	Processor
57000	"	Post Processing
58000	"	Miscellaneous
59000	"	Project Management
60000	"	Common Costs

In addition, the last ten numbers of each series are to be set aside for common usage items as follows:

5X990	Salary/Wages
5X991	Personnel Benefits
5X992	Travel
5X993	Misc. Materials/Services
5X994 through 5X999	unassigned.
