

ELECTRONICS MEMO NO. 115

NATIONAL RADIO ASTRONOMY OBSERVATORY
Charlottesville, Virginia

May 26, 1989

MEMORANDUM

To: VLBA Electronics Group

From: A. R. Thompson

Subject: Module Serial Numbers

This memorandum is concerned with those modules which are now being constructed by NRAO, but of which the early units were constructed at Haystack. It was decided at the electronics meeting on May 11 that serial numbers for the units constructed by NRAO will run on from the Haystack serial numbers without any gap in the numbering. The modules are listed below, together with the highest Haystack serial number for each type.

Highest Haystack Serial No.

D 121	Sampler	4
D 122	Output Rate Synthesizer	2
D 123	Formatter	4*
L 121	5 MHz Distributor	9
L 122	32 MHz Synthesizer	4
T 121	IF Distributor	8
T 122	Baseband Converter	16

*The prototype Formatter is being kept as a laboratory unit and can be considered to be serial No. 0.
