

National Radio Astronomy Observatory

Charlottesville, Virginia

December 3, 1982

To: VLBA Scientific Working Group

From: K. Kellermann

Subject: Agenda for December 10th Meeting

The following questions have arisen during the course of the meetings of the various working groups:

- A) Number of instantaneous IF channels needed (see VLBA memos nos. 138, 140, 141, 145, 146, 148 and 151)
- B) Dual frequency observing
- C) Required antenna slew rates for astrometry and geodesy
- D) Required number of channels for spectroscopy
- E) 6 GHz vs. 5 GHz
- F) Puerto Rico site vs. Alaska site
- G) Collecting area vs. shorter wavelengths
- H) Short spacings (30 to 200 km)

The meeting will start with a review of progress from each of the Working Group chairman and then, as time permits, we shall specifically address the above items. If you have other topics you want to discuss, please contact me before the meeting.
