To: VLBA Working Group

From: H. Hvatum

Subject: VLBA Proposal

You have just received several memos dealing with the planned NRAO proposal for a VLB array. The distribution list is memo #36. A subgroup of this list of names (marked with an asterisk) has already met to discuss details of the proposal. I suggest to continue with this subgroup as the main participants in the proposal writing, but with the whole VLBA working group informed through the memo series. If any of you who are not presently part of the * group wish to participate in the actual writing, let me know. Everybody is, of course, welcome to participate in future meetings.

The next meeting of the * group will be held Tuesday, November 3, at 1500 EST (800-243-1055).

Attachment - memo #36
