NATIONAL RADIO ASTRONOMY OBSERVATORY
Charlottesville, Virginia

November 17, 1987

To: VLBA Science Group
From: K. I. Kellermann
Subject: VLBA Science Group Meeting, December 7, 1987

The meeting of the VLBA Science Group originally scheduled for December 7, and later canceled, is now reinstated for the same date and time, and is open to anyone interested. The primary purpose of the meeting is to discuss, for the last time, the proposed change of the location of the northeast antenna from New England to Green Bank. In preparation for the meeting please review VLBA memos 437 and 486 by Seielstad; 438, 535, and 591 by Walker; 609 by Oty; and 610 by Peery. If you need copies of any of these memos and cannot obtain them from your library or a nearby colleague, please call either Betty Trujillo at (505)835-5690 or Carolyn Williams at (804)296-0281.

If you wish to file written comments prior to the meeting, this would help to focus the discussion. Any comments should be sent to Phobos::VLBI. I will forward anything I receive to other people at NRAO who are not on the VLBI mailing list.

There will also be a short agenda item dealing with the location of the Hawaii antenna.

Please attend if you can, and please bring this meeting to the attention of those at your institution who do not receive mail addressed to VLBI.

Date and time of meeting: Dec 7, 1300 EST
Telephone number: (203) 797-0905
Conference ID: 999K

Please note that the meeting will start promptly at 1300. Because of the large number of sites involved, it may take 5 or more minutes for you to contact Connex and be connected to the conference.
