Milestone						
2.5	NA ALMA Operations					
	Operations					
2	Review conference applications	12/31/2019				
	Chile Office					
9	Power options for Parque Astronómico Atacama and ALMA	12/31/2019				
10	Office lease alternatives for OCA	12/31/2019				
13	Plan to improve maintainability of AOS technical building	12/31/2019				
14	Management of FEHV warranty	12/31/2019				
15	Multicancha project – delivery and inauguration	12/31/2019				
16	Collective bargaining	12/31/2019				
17	STEM EPO and D&I	12/31/2019				
3.3	New Mexico Operations					
	Very Large Array					
	Operations					
	Define VLA GO and SRO capabilities to be offered for Semester 2020B	12/31/2019				
5	Determine baselines and pointing for antennas moving into their D configuration locations	12/31/2019				
8	Reconfigure from A to D configuration	12/31/2019				
	Maintenance and Renewal					
19	Perform preventive maintenance on each of two transporters prior to array reconfiguration to D	12/31/2019				
25	Perform preventive maintenance on the next configuration VLA antenna transformers prior to array	12/31/2019				
	Oberations					
43	Define VLBA GO and SBO capabilities to be offered for semester 2020B	12/31/2019				
15	Maintenance and Renewal	12/31/2017				
55	Major Maintenance Visit #1	6/30/2020				
57	Cold temperature operating report	12/31/2019				
4.3	Central Development Laboratory					
	Operations					
I	Build and test Band 1 cryogenic amplifiers	12/31/2019				
2	Build and test ALMA Band 1 local oscillators	12/31/2019				
	Development					
5	Design, fabrication, and testing of 310 MHz short-backfire antenna	12/31/2019				
	Maintenance Renewal, and Warranty Claims					
11	VLA/VLBA multichip module support	12/31/2019				
5.7	Science Support and Research					
	TAC					
5	TAC Meeting, Semester 2020A	12/31/2019				
7	Update SW requirements for TAC 2020A	12/31/2019				
	Science Ready Data Products					
14	Wave-1 SRDP operations	12/31/2019				
15	SRDP Wave-2 capabilities and requirements	12/31/2019				
16	IIA Iools Conceptual Design Review	12/31/2019				
	Scientific User Support	10/01/0010				
21		12/31/2019				
27		12/21/2010				
2/	lansky Fellows selection completed	12/31/2017				
51	Student Programs	12/31/2017				
34	Student Observing Support selection (VLA)	12/31/2019				
6.6	Data Management and Software	12/31/2017				
0.0	sis					
4	Investigate HTCondor for local VLASS operations	12/31/2019				
	ALMA Systems Software					
10	ALMA Cycle 8 Release	12/31/2019				
	CASA Pipeline					
30	Pipeline C7/SRDP Release	12/31/2019				
32	Pipeline Python 3 Planning	12/31/2019				
	Science Support and Archives					
34	PST Updated for Semester 2020B	12/31/2019				
36	OPT Updated for Semester 2020A	12/31/2019				
40	SRDP-Wave-1	12/31/2019

Color code: Cost/Schedule/Scope Cells

Blue - early

Green - on track

Yellow - expected to miss an <u>upcoming</u> milestone and/or not meet scope, and/or be underspent or overspent on budget

Red - not completed by due date and/or overspent on budget, and/or unable to perform to the scope

Grey - completed

COST:			SCOPE: Office lease alternatives were analyzed and		
Labor Actuals	Expected				
\$	5		presented in August. C	DCA identified suitable	
Material Actuals	Expected		in October, completed	the office design in	
\$	5		Q1, and will bid the co	onstruction/outfitting	
Travel Actuals	Expected		work in Q2.		
\$	\$				
SCHEDULE:			RISK & MITIGATION:		
Milestone	Schedule	Target	Risk	Mitigation	
 Present office lease alternatives for OCA, including analysis of rental and outfitting costs. 	12/31/2019	Completed	 No risk associated with this milestone. 	N/A	

COST: No costs associated with early completion of the analysis leading to identification of new office space. Moving forward, office move has been organized as a project, with a set budget.

SCOPE: OCA analyzed several lease options in the vicinity of ALMA's Santiago Central Office and chose the best in terms of location, characteristics, and price. The scope of the office move is being managed by a working group, which captured the requirements, oversaw the architectural design, prepared the documentation for the construction bid, and closely monitors progress.

SCHEDULE: This milestone was completed ahead of schedule, taking advantage of a very good lease opportunity.

RISK & MITIGATION: No risk directly associated with this milestone. Risk of office move project is overspending budget and/or taking longer than expected. The working group is mitigating these risks by closely monitoring the design and specifications, as well as hiring a technical inspector of works to oversee construction/outfitting.

COST:			SCOPE:		
Labor Actuals	Expected		Present ProVoca campaign at Latin American		
			Antofagasta and at IA	U Symposium on	
Material Actuals	Expected		Equity, Diversity, and I	nclusion in Tokyo.	
\$2,000	\$2,000		OCA presented ProV	oca in Tokyo, but	
Travel Actuals	Expected		canceled its participation in the LARIM meeting due to civil unrest in Chile.		
SCHEDULE:			RISK & MITIGATION:		
Milestone	Schedule	Target	Risk	Mitigation	
1. Present ProVoca campaign at LARIM and IAU meetings	November 2019	LARIM cancelled: milestone complete	 Missed opportunity to present ProVoca at LARIM. 	 Carry out ProVoca activities outside Santiago in FY2020. 	

COST: Paid for, but could not use, AUI/NRAO stand at LARIM (\$2,000).

SCOPE: Part of the scope was completed, i.e. PROVOCA was presented at the IAU symposium. OCA decided to cancel its participation in the LARIM meeting due to the civil unrest in Chile.

SCHEDULE: There is no new target for presenting at LARIM, since it takes place once every three years. Milestone will be marked as completed next quarter.

RISK & MITIGATION: Missed opportunity will be mitigated by carrying out ProVoca activities outside Santiago during FY2020.

COST:			SCOPE:		
Labor Actuals	Expected		The scope of	this milestone is to	
\$	5		perform criti	cal preventive and	
Material Actuals	Expected		W/A VI BA	aintenance at the Brewster,	
\$	\$		TYA, YEBA SIL	NB1	
Travel Actuals	Expected				
\$	\$				
SCHEDULE:			RISK & MITIGATION:		
Milestone	Schedule	Target	Risk	Mitigation	
 Major maintenance visit 	6/30/2020	10/23/2019	I. None	1. None	

SCOPE: No impact.

SCHEDULE: Due to scheduling availability of critical personnel, this maintenance was performed in Q1 instead of Q3 as originally planned.

RISK & MITIGATION: No impact.

COST:			SCOPE:		
Labor Actuals	Expected		RF design-work fo	r this feed	
\$	\$		has been complete	d.	
Material Actuals	Expected		Subsequently, a ply	wood	
\$	5		mockup has been	built to test the form factor.	
Travel Actuals	Expected		being performed p	for to machining the 310	
\$	S		MHz antenna in th	e Green Bank workshop.	
SCHEDULE:		_	RISK & MITIGATION:		
Milestone	Schedule	Target	Risk	Mitigation	
 Deliver tested 310 MHz feed and test data 	12/31/2019	6/30/2020	I. Not applicable	 Testing to proceed 	

SCOPE: A plywood mock-up has been built to test form factor, clearance, etc. As for the actual antenna, we have performed electrical simulations and are currently doing wind loading. When that is complete (by February) we will show the electrical and wind loading results to GBO, and if they approve, full drawings will go to GBO for them to build.

SCHEDULE: Manufacture of this feed is scheduled for Q2 FY2020, and testing is nominally planned to be completed in Q3 FY2020.

RISK & MITIGATION: The overall 310 MHz project is a MSIP proposal (with University of Richmond) now and we have submitted a pre-proposal. In March, NSF will decide if we are worthy of a full proposal, which would be due in May. The GBO construction of the 310 MHz antenna, however, does not depend on the MSIP award, and GBO plans to build the antenna and do live testing on the GBT.

COST: No impa	ct on cost		SCOPE: This milestone marks the beginning of th SRDP Wave L deployment. The		
Labor Actuals	Expected				
5	5		deployment is mo	oving forward as planned	
Material Actuals	Expected		but not all archive	e capability has been fully	
> Travel Actuals	Functed		validated yet.		
\$	\$				
SCHEDULE:	,		RISK & MITIGATION:		
Milestone	Schedule	Target	Risk	Mitigation	
I. Commence SRDP Wave Operations	12/31/2019	2/28/2020	1. Failure to Validate	 Accept and issue updates if bugs are found 	

SCOPE: No impact.

SCHEDULE: Wave I Operations have commenced, production archive code has been deployed but some validation tasks remain on late breaking bug fixes.

RISK & MITIGATION: The code has been in production, with ongoing bug fixes. There is still a risk for a Failure to Validate or break working code. This is mitigated with further bug fixes and repeated validation.

COST: No impa	ct on cost		SCOPE:			
Labor Actuals	Expected		No impact on scope. Milestone marks			
\$	5		Completion of a Co	npletion of a Conceptual Design		
Material Actuals	Expected	Expected define the concept more fully.		more fully. The concent		
\$	\$		and design are cur	rently iterating between		
Travel Actuals	Expected		the Project Archite	ct and Project Scientist.		
\$	\$		and roject a chicer and roject scientist			
SCHEDULE:			RISK & MITIGATION:			
Milestone	Schedule	Target	Risk	Mitigation		
I. Conceptual Design Review	12/31/2019	4/15/2020	 Further delay if Chair not available in Q2 FY2020 	1. Close communication with Chair and review participants		

SCOPE: No impact.

SCHEDULE: This delay resulted from gaps discovered in the initial concept and requirements by the system architect, which need to be resolved prior to moving forward with the Conceptual Architecture. In addition, the Architect requested to include prototyping prior to the CoDR to validate the system architecture. A review chair has been appointed to conduct the external review, gaps have been addressed, and the design is progressing.

RISK & MITIGATION: Delay may interfere with the availability of the review committee, adding further delay to conduct review or reappoint a new Chair and committee members. This will be mitigated by close communication with chair to determine availability of key participants.

COST:			SCOPE:	
Labor Actuals	Expected		Create the archite	ecture and
DMS funds this activit	ty at a higher	WBS level.	implementation pl	an for the LIA tools
Material Actuals	Expected		to implementation	(no change)
\$	\$		to implementation	(no change).
Travel Actuals	Expected			
\$	\$			
SCHEDULE:	RISK & MITIGATION:			ON:
Milestone	Schedule	Target	Risk	Mitigation
 Architecture document Implementation plan 	12/1/2019 12/1/2019	4/15/2020 4/15/2020	1. Resource availability	1. Prioritize

COST: DMS funds this activity at a higher WBS level. Costs are not tracked for this milestone.

SCOPE: The project to re-engineer the TTA tool suite is managed by SRDP. The project will transition from the initiation phase to the implementation phase in Q2 FY2020 with completion of a Conceptual Design Review (CoDR). DMS will create the architecture and implementation plan for review at the CoDR (no change).

SCHEDULE: This delay resulted from gaps discovered in the initial concept and requirements by the system architect, which need to be resolved prior to moving forward with the Conceptual Architecture. In addition, the Architect requested to include prototyping prior to the CoDR to validate the system architecture.

RISK & MITIGATION: Uncertainty about resource availability for completion of requirements in time for analysis and architecture completion. This will be prioritized to facilitate completion.

COST: No Impa	act on Cost		SCOPE:		
Labor Actuals	Expected		No impact on scope		
\$	\$		This milestone has a dependency on SSR Milestone 5.7.16		
Material Actuals	Expected				
\$	\$		Theseone 57710		
Travel Actuals	Expected				
\$	\$				
CHEDULE:			RISK & MITIGATION:		
Milestone	Schedule	Target	Risk	Mitigation	
I. CoDR	Oct 2019	4/15/2020	 Schedule risk due to 5.7.16 	I. Accept schedule risk	

SCOPE: No impact.

SCHEDULE: This milestone is the Project Management component to oversee preparation of the document package, administration, and logistics for the review addressed in SSR Milestone 5.7.16. All critical documents in the package are in well developed drafts, the chairperson has been appointed and received the meeting plan mid/late January, the document package has a target completion date by the end of February.

RISK & MITIGATION: Schedule risk exists due to the dependency on 5.7.16, other risk is minimal since the review processes have been successfully executed on previous reviews.

COST:			SCOPE:		
Labor Actuals	Expected		The 35 th Annual New Mexico Symposium was delayed by several months to accommodate the schedule		
5	5				
Material Actuals	Expected				
\$	5		of the 2019 Jansky Lecture. This one-day

Travel Actuals	Expected				
\$	\$				
SCHEDULE:			RISK & MITIGATION:		
Milestone	Schedule	Target	Risk	Mitigation	
I. VLBA Fiber Installation Complete	12/31/2019	6/30/2020	 Risk of schedule slipping as we are dependent on third parties to execute the contracts. 	 Continue to influence Los Alamos and UNH to get the work accomplished. 	

SCOPE: No impact.

SCHEDULE: No cost extension was approved by NSF. Los Alamos has not started and is reconsidering the contract as the contractor has increased cost. U of NH has an agreement with the town of Peterborough to bury the fiber over a one mile stretch. This will cause a schedule delay and an increase on cost. The amount of the increases are not yet determined.

RISK & MITIGATION: Risk of schedule slipping as we are dependent on third parties to execute the contracts. Continue to influence Los Alamos and UNH to get the work accomplished.

COST:			SCOPE: This year the PIO's will work with NRAO/ALMA/VLA/ngVLA directors to establish a relationship with key reporters.

SCHEDULE:			RISK & MITIGATIO	ON:		
Milestone	Schedule	Target	Risk	Mitigation		
I Deliver reworked FEHV I to JAO	12/31/2018	02/20/2020	1 Cannot complete this milestone in Q2 FY2020.	Work with Contractor to resolve FEHV scheduling issues.		

COST: No change in cost.

SCOPE: No change in scope; delivered FEHV to incorporate welding improvements and mass reductions.

SCHEDULE: The Contractor was able to resolve issues with the lift jacks on Units #3 and #4 that were previously reported and the FEHV Units packed and shipped to the OSF arriving at the OSF on 21 October 2019. Unfortunately, the arrival of the FEHV units coincided with the dramatic increase in civil unrest in Chile, which lead to cancelling the vehicle PAS and Acceptance Review scheduled to begin on 24 October. The civil unrest was mitigated sufficiently by mid-November to allow rescheduling of the vehicle PAS Reviews which began on 21 November; the PAS Reviews were satisfactorily completed on 23 November. Unfortunately, because of scheduling issues with several key JAO personnel, the Final Acceptance Reviews (ACRVs) could not be scheduled for December and are therefore planned for 14 January 2020. Unfortunately, a site-wide power blackout in the early morning hours of 14 January forced the cancelation of the planned ACRV as all available personnel including Staff pertinent to the ACRV were assigned to Antenna Recovery. Because of previously scheduled vacations for ALMA and NRAO Key personnel, the ACRV has now been rescheduled for 20 February.

RISK & MITIGATION: Until the installations are completed, observationally verified, and all units are working reliably, risk will remain. This risk is primarily borne by the vendor, and is being mitigated by close observational and engineering verification of the work.

COST:			SCOPE:		
Labor Actuals	Expected		Execute FEHV Part mass reduction changes; reassemble Units; verify and test assembled Units; conduct delta- PAS; and deliver Units #2, #3, and #4 to ALMA JAO.

\$	\$						
Travel Actuals	Expe	ected					
\$	\$						
SCHEDULE:	CHEDULE:		RISK & MITIGATION:				
Milestone		Schedule	Target	Risk	Mitigation		
I. Inauguration		9/30/2019	6/15/2020 TBD	Falling short of staff expectations as collective bargaining process approaches.	Contract addendum to help the contractor finish the project. Communications to manage staff expectations.		

COST: Rescheduling the inauguration ceremony does not involve additional cost.

SCOPE: Scope is not affected by rescheduling.

SCHEDULE: A construction end of February 15th, plus 60 days for JAO acceptance, means that the facility will not be delivered before mid-April. Considering past contractor performance, a month's margin seems appropriate, bringing the new date for inauguration to mid-May. However, this timing may conflict with collective bargaining. As the project advances and we have a precise idea of the completion date, we will define the exact date (perhaps mid-June).

RISK & MITIGATION: The main risk of not completing this project on time, and inaugurating the facility with significant staff engagement, is falling short of expectations. The mitigation in place is a contract addendum that includes bonuses for performance. In addition, once we have clarity about completion dates we will communicate to staff in order to manage expectations.

COST:			SCOPE:				
Labor Actuals	Expected		The production schedu	le of VLASS SE images wi			
5	5		be redefined (FY2020 #	\$5.7.17) after completion			
Material Actuals	Expected		or imaging NAU project	or maging hoto project.			
\$	5		We propose to cancel this milestone in preference of the revised schedule being				
Travel Actuals	Expected						
\$	\$		developed.				
SCHEDULE:		RISK & MITIGATION:					
Milestone	Schedule	Target	Risk	Mitigation			
 Begin VLASSI.I SE continuum imaging Begin VLASSI.2 SE continuum imaging 	12/31/2018 (original scope) 9/31/2019 (Revised Scope)	TBD TBD	 Computing needs exceed current capacity Processing needs additional algorithmic development 	 Engagement with CHTC and OSG Engage with ARDG to develop required algorithms. 			

COST: Current tests of algorithms being developed indicate additional compute resources are needed to support VLASS SE imaging. Outsourced processing is under investigation by the DMS SCG group, with High Throughput Condor (HTCondor) at the Univ. of Wisc. as the most promising and cost effective way forward.

SCOPE: VLASSI.I data contains pointing errors with 2/3 of the VLA antennas, discovered after the FY2019 Program Operating Plan was written. Scope was changed to begin the VLASS I.2 Single Epoch continuum in QI.

SCHEDULE: An candidate imaging algorithm suitable for processing VLASSI.2 is available in CASA and has been integrated with the VLASS Pipeline. Validation through the first quarter of FY2020 has been unsuccessful, thus production imaging has not commenced. Milestone #5.7.17 in Q2 FY2020 is to redefine the production schedule making this milestone obsolete. We propose to cancel this in preference of the (TBD) revised schedule.

RISK & MITIGATION:

- There continues to be a risk (most likely scenario) that the computing needs will exceed the inhouse capabilities. NRAO is engaged with the Center for High Throughput Computing at UW and the Open Science Grid to address this issue.
- Without a validated pipeline there continues to be a risk that additional algorithmic development will be required to produce the single epoch continuum images. We have initiated a high-priority R&D project specifically targeting the single epoch continuum imaging issues.

COST:			SCOPE:	
Labor Actuals	Expected		Major maintenai	nce visit to Los Alamos
SCHEDULE:		additional staff. There is no change to the scope.		
Milestone	Schedule	Target	Risk & PittiGA	Mitigation
I Completion of maintenance visit	6/30/2019	3/30/2020	I Azimuth 2 wheel assembly failure	Routine monitoring of assembly performance and lubrication quality. Send separate team for assembly

COST: No change.

SCOPE: No change. Visit includes a preventive replacement of the azimuth 2 wheel assembly.

SCHEDULE: Because of major resource conflicts due to the St. Croix repair project and the need to visit Mauna Kea twice during FY2019, staff and equipment were unavailable to support this trip. The Tiger Team visit is now scheduled for Q2 FY2020, at which point Los Alamos will receive a major preventive maintenance visit by staff from the Electronics and Engineering Services divisions.

RISK & MITIGATION: Due to the planned replacement of the wheel assembly being delayed, its performance and inspection of grease for signs of a failure are being watched closely. If signs of an impending failure are seen, antenna mechanics and engineers responsible for the assembly swap can be sent earlier than the main visit. There are currently no signs this is needed, despite this being the oldest remaining wheel assembly in the VLBA.

COST:			SCOPE:			
Labor Actuals	Expected		An external system-l	evel requirements and		
5	5		architecture review v	will ensure an completeness in the

Travel Actuals	Expected		design down-selections.			
\$	\$					
SCHEDULE:	CHEDULE:		RISK & MITIGATION:			
Milestone	Schedule	Target	Risk	Mitigation		
Requirements & Architecture Review	9/30/2019	3/30/2020	Incomplete definition of subsystem requirements	Complete the review		

COST: No change

SCOPE: No change

SCHEDULE: A Stakeholders Requirements Review was held in Socorro on September 26, partially fulfilling the original intent of this milestone. The review was chaired by Michael Rupen (NRC) and Melissa Soriano (JPL). The committee noted the high quality of the documents they reviewed, and provided useful feedback on the documents in the form of Review Item Discrepancies (RIDs). The RIDs are being addressed, and the review was successfully concluded. Other system requirements and the ngVLA architecture need to be reviewed in a separate undertaking in Q2 FY2020. The design and development effort has slowed in comparison to what was originally scheduled, because the funding for it is lower than anticipated.

RISK & MITIGATION: The high level requirements and architecture need to be reviewed for completeness and overall coherence so that the requirements for subsystems are in turn complete. By not conducting this review, the requirements definition for a subsystem could be incomplete, leading to an incorrect decision in a design downselect or to a subsystem that does not deliver its requisite functionality. The risk can be mitigated by completing the review.

COST:			SCOPE:

\$	\$		Canssian reed norms,			
CHEDULE:		RISK & MITIGATION:				
Milestone	Schedule	Target	Risk	Mitigation		
Revised optical design	3/30/2019	6/30/2020	Less than optimal aperture efficiency and/or a late optical design introduces major structural changes to the antenna.	Ensure the optical design is optimized prior to the completion of a detailed mechanical design of the antenna.		

COST: No change

SCOPE: No change

SCHEDULE: The current optical design for the ngVLA antenna continues to look very good, and we aren't expecting major changes to it. The risk of using the existing model, and then having to make major changes to the structural design, has decreased. However, additional trade studies and engineering analyses need to be completed before the new optical design is done. The urgency of completing this milestone has greatly diminished. Considering other priorities and project needs, the new optical design does not need to be completed until Q3 FY2020. The delay should not affect the overall mechanical design as that process appears more lengthy than originally anticipated.

RISK & MITIGATION: The ultimate intent of the optical design is to optimize the aperture efficiency of the antennas. The higher the efficiency, the fewer number of antennas need to be built (at some level). Additionally, there was some concern that the optimized optical design would have major impacts on the structural design of the antenna, but this seems not to be a major design driver. The optical design needs to be finalized prior to the completion of the antenna's mechanical design.

COST:			SCOPE:			
Labor Actuals	Expected		The Integrated Receiv	ver concept combines		
S Material Astuals	5 Eveneted		downconversion, sam	ing, and data weight, compact package		
Thaterial Actuals	s		that offers advantages	in cost, performance, and		
Travel Actuals	Expected		reliability. The performance of the Integrated			
\$	s		demonstration board.			
SCHEDULE:			RISK & MITIGATIO	N:		
Milestone	Schedule	Target	Risk	Mitigation		
 Complete tests of the Integrated Receiver chip on a demonstration board. 	9/30/2019	3/31/2020	 ASIC does not perform as designed 	 Revise the design to correct shortcomings revealed in the characterization tests. Adopt the discrete component design, which wil require more space and cooling. 		

SCOPE: No change. The Integrated Receiver concept has been demonstrated with discrete components, but this has yet to be demonstrated with the ASIC chip that includes all of the stated functionality. The purpose of this milestone is one of risk reduction in showing that the ASIC performs in accordance with its design.

SCHEDULE: The ASIC chips have been delivered, but have yet to be characterized in the demonstration board. This board has been fabricated, and tests are underway. Tests are expected to be complete by March 31, 2020. Note: this task tracks to CDL milestone 5.3.12.

RISK & MITIGATION: If the ASIC does not perform as intended, its design could be revised to address the shortcomings identified in the characterization tests. However, this could be at considerable cost since it might require another (expensive) wafer run for the ASIC. Alternatively, the ASIC development effort could be abandoned in favor of the discrete component design, which has been demonstrated to work. However, the discrete component design will require more space and cooling, and is likely to be less reliable than the ASIC design.

COST:			SCOPE:	Photo of a populated SADC		
Labor Actuals	Expected			Approximately 50% to 75% of		
5	\$			and signal access connectors.		
Material Actu	als Expected		The delays in past	t were attributed to resource		
\$	5		shortages due to	the CUP project which is		
Travel Actuals	Expected		boards have been designed, fabricated,			
\$	s		populated, and they are currently being tested			
SCHEDULE	B		RISK & MITIGAT	TION:		
Milestone	Schedule	Target	Risk	Mitigation		
 Test SADC prototype ASIC 	Was 6/30/2019 Revised to 9/30/2019 in FY2019 Q4, then to 12/31/2019 in FY2020 Q1	Now requesting 3/21/2020	1. Not applicable.	I_ Most of the previously described risks have either materialized or addressed – currently evaluation is underway.		

SCOPE: No impact/change.

Next steps:

I. Ensure all circuits come up and are functioning (at CDL),

2. Ensure SADC output is nominally working and decoding algorithm is working (at CDL),

3. Ship a couple of boards to ASIC vendor (City Semiconductor, SF) for full evaluation of ASIC functionality.

SCHEDULE: As explained above, it is foreseen that additional schedule is required to complete this task.

RISK & MITIGATION: Most of the risks described previously have been mitigated, and evaluation is in progress.

hange to overall project scope; this is a over from FY2019.		
over from FY2019.		
result of responding to external scope		
A User Driven Imaging deployment.		
was delayed. RISK & MITIGATION:		
hedule Risk I. Accept (see notes)		

SCOPE: No Change to overall project scope, priorities were adjusted to exchange some scope items between Pilot development and Wave I development, primarily to support large projects. These scope adjustments resulted in deferred deployment of the ALMA User Driven Imaging (AUDI) until near the planned end of Pilot Operations. The final capability, ALMA User Driven Imaging (AUDI), was deployed but insufficient operational experience was gained by the scheduled target of FY2019 Q4. Pilot AUDI operations are currently ongoing.

SCHEDULE: The original target for completion of Pilot Operations was FY2019 Q4, most of which has been met with the exception of AUDI. We are extending the Pilot Operations period to allow for development of operational experience.

RISK & MITIGATION: Risk of further schedule delay is low, preliminary results from validation indicate most known issues have been adequately addressed.

COST:			SCOPE:			
Labor Actuals	Expected		Conduct an analysis of the	e ngVI A Imaging		
\$	5		requirements, define the a	algorithms that will be		
Material Actuals	Expected		needed in order to meet	iem, and estimate the wer that will be		
\$	\$		necessary for calibrating t	he observational data and		
Travel Actuals	Expected		synthesizing images for the science cases specified in the ngVLA reference observing program			
\$	\$		an are ng to reference observing program.			
CHEDULE		RISK & MITIGATION:				
Milestone	Schedule	Target	Risk	Mitigation		
 Algorithm study released (report/memo) 	06/30/2019	TBD	 Underestimation of the computational resources required by the project. 	 Maintain focus of key staff involved on this activity. Characterize the estimation uncertainty in the ngVLA reference design and define adequate contingency budge for DS020 		

SCOPE: No impact.

SCHEDULE: Competing priorities within NRAO have delayed the completion of this milestone. It also required input from the ngVLA reference observing program, which has been completed. The task is currently predicted to be complete by March 31, 2020.

RISK & MITIGATION: The risk of not completing the algorithmic study is under-estimating the computational resources that will be required by ngVLA to produce its expected science products. In addition, a weak estimation in this area could suggest to DS2020 that the technical concept for the array is incomplete. This risk will be mitigated by maintaining the focus of the key personnel involved in writing the report. It would also be adequate to conduct a review of this report in anticipation of requests for additional information from DS2020.

COST: Current VLBA lease rate:	\$500 per year		SCOPE: Owens Valley, CA site sub-lic Observatory (OVBO) is lan	ease with Owens Valley Radio	
Expected new lease rate:	OVRO hopes to lease with LADV the VLBA share is year:	negotiate a VP such that s < \$3,000 a	CalTech) has received a draft lease from Los Angeles Department of Water and Power (LADWP) and they have shared it with NRAO (we have no concerns or comments). NRAO has also reviewed and approved the draft of its sub-lease with OVRO which will be signed after OVRO signs the master lease. LADWP expects the lease to officially commence "soon."		
SCHEDULE:			RISK & MITIGATION	4:	
Milestone	Schedule	Target	Risk	Mitigation	
Owens Valley Lease renew	ed 03/31/2015	2020	 Impact on VLBA operating budget (increase in lease cost – but early indications are for a modest increase) Impact on VLBA operation 	 Adjust VLBA Operating budget, if necessary. Avoid by periodic follow up of Caltech negotiation progress 	

COST: Future lease costs are subject to the status of Caltech's re-negotiation of the lease with Los Angeles Water and Power.

SCOPE: No changes.

SCHEDULE: <u>Owens Valley Lease</u>: The master lease for the Owens Valley Radio Observatory is an agreement between Caltech and Los Angeles Water and Power (the lease holder). The master lease has been expired for since March 31, 2015, and renegotiating it does not appear to be a priority for LA W&P. NRAO has a sublease agreement for VLBA-OV with Caltech. We will continue to monitor the situation with the master lease.

RISK & MITIGATION:

- I. Caltech has leased Owens Valley, CA for a low yearly fee. The probability of a cost increase is low, but a budget adjustment would be needed if a cost increase occurs.
- 2. Impacts on other aspects of VLBA Operations are not likely to occur.
- 3. An interim agreement between Caltech and NRAO regarding the sublease during this interim period has been discussed and our continued occupancy is not an issue.

Astronomy in Chile Education Ambassadors Program: First week of October on NM Tech campus and tour the VLA and DSOC with VLA and ngVLA talks. 24 Attended (seen in group photo), smaller group photo features Sian Proctor, Amy Jackson, Angela Osterman Meyer, and Derek Demeter.

Outcomes: Earth and Sky blog by Rob Pettingill <u>https://earthsky.org/space/nightscape-photos-very-large-array-vla-observatory</u>

Our goal was to have them fall in love with other NRAO facilities beyond our partnership with ALMA. Parts of the meeting were also focused on plans for the future of the program informed by a survey that set some priorities.

Total # of Survey Participants = 42. ACEAP provides unique access to facilities and people, and the astronomy ecosystem; 37/42 ranked this very important. ACEAP brings together a group of people with diverse backgrounds and skill sets from both informal and formal education communities; 36/42 ranked this very important. ACEAP invests in people, we don't quit at the end of the expedition or year of involvement; 29/42 ranked this very important.

Education and Public Outreach STEAM Ed: PVCC 10th Grade Career Day

<text><list-item><list-item><list-item><image><image>

Sarracino STEAM Night - October 3rd

Education Specialist Faith Vowler participated in Sarracino Middle School's annual STEAM Night on Thursday, October 3rd, from 5-7 PM. She gave demonstrations for the visiting parents and students using the Cosmic Coloring red and blue glasses activity. She also handed out "Want More VLA" cards and "Cosmic Coloring" postcards to interested parents and students and directed them to the NRAO website, and told them about the upcoming Fall Open House at the VLA (which took place on Saturday, October 5th) while encouraging them to attend. At a rough estimate, 100 students and parents came to the Sarracino STEAM Night.

http://www.dchieftain.com/news/education/science-and-math-night-picture-gallery/collection_7c99c102-eadc-11e9-ab2c-af95f698ef49.html#5

San Antonio Elementary School Star-Party - December 6, 2019

On Friday, December 6th, Summer Ash and Faith Vowler visited San Antonio Elementary School in San Antonio, NM to participated in an afternoon of astronomy activities in advance of the school star-party that evening. Four groups of 15-20 students rotated between four stations, spending approximately 20 minutes at each. The groups were mixed grade levels ranging from Kindergarten to 5th grade. The NRAO station had two activities that focused on invisible light; Faith led the red/blue glasses activity and Summer ran the emission spectra with diffraction glasses activity. Each group was split into two so they spent 10 minutes doing one activity and then switched. The entire student body (~80 students) participated. [We didn't get any photos of the activity, but I snapped this one of the sign for our station.]

Festival of the Cranes Photo Shoot - November 21st, 22nd, and 23rd

The annual Festival of the Cranes nighttime photo shoots took place at the VLA in the Activity Center on the evenings of Thursday, November 21st; Friday, November 22nd; and Saturday, November 23rd. On Thursday and Friday, both Faith Vowler (the Education Specialist) and Summer Ash (the Senior Education Specialist) were in charge of this event; on Saturday, Summer was the sole point of contact. On each evening, Summer and Faith were present in the Activity Center throughout the event to provide coffee and hot tea, help Roman set up his presentation, inform the visitors of the places on site where they were allowed to go, and talk with and answer questions from the visiting photographers. Roughly 25 people each came to the Thursday and Friday shoots, and around 20 people came to the Saturday event, for an approximate total of 70 people throughout the three evenings.

Education and Public Outreach News: NRAO Announcements

Education and Public Outreach News: Six ALMA stories

In addition to these results, our PIO teams were preparing for press conferences that they would have at the winter AAS in Q2.

We had two blogs last quarter, one about the top 10 countdown, and this one from Lisa Locke, our Jansky Fellow at CDL who just left for a great job at JPL. We're not quite keeping the pace of one per month, but it's a goal.

We also had our first web intern, Stephanie Kazemi. She was assisting mostly with behind the scenes clean up within Wordpress-- eliminating duplication in our image files and improving our search engine optimization. This was the first time our webmaster supervised an intern, so he did an exceptional job of tutoring her to make sure that she learned new skills as well as getting work done for us.

We didn't have any major new pages launched or old pages redesigned, but one little feature that made available on pages where we might want to share code is something called "Code Box" where on pages like the Ask An Astronomer page, actual lines of code can easily be copied, preserving all the critical formatting.

The team put in extra hours over the holidays to complete a pebbles-to-planets video that celebrates how radio, optical, and IR observatories are working together to unravel the mystery of how planets and distant solar systems form and how a new generation of observatories will be needed to answer some of the remaining questions.

The big new project that we completed early is a VR exploration of ngVLA.

This Quarter we reached out to the Bad Astronomer, Phil Plait, to write one-minute summaries of the top 10 discoveries of the year for ALMA. He has featured many of our press releases in his blog for SciFi. He enjoyed the challenge of being so brief, recorded the audio, and our amazing Jeff Hellerman used the visuals and B roll to create the 10 videos that we released at the end of 2019.

During the Program Plan Review, several of us were asked if we were content with the credit that ALMA got for its contribution to making this image possible. There were many fighting for a piece of that spotlight, so we simply tried to put out good information, but in our countdown, we made it clear that were proud of that contribution.

The full set can be found here: https://public.nrao.edu/gallerysearch/?search_text=ALMA+Top+10&search_type=release

Phil also wrote about it on his blog and while I try not to succumb to flattery, it was fun to read this in his blog about working on the project.

"It was an honor to work with the folks at NRAO on this, and I'm very pleased they asked me to do this. When I was in graduate school at the University of Virginia, NRAO HQ was right up the street from us, and I was over there pretty often to attend speaker colloquia and talk to the scientists there about one topic or another. To be able to actually work with them now and create this countdown was a true honor. It was also personally and deeply satisfying, connecting my present with my past when I was just getting started with my astronomy career. So thank you, NRAO and ALMA, for letting me be a part of this, but also for your dedication to observing the Universe ... and making sure folks down here on Earth can get a glimpse of it, too."
